Criterion E: Evaluation

Success Criteria	End Result
1. Be able to see how much money was spent in a month.	*Met, program successfully does Goal 1.*
1. Be able to see all the different categories of spending.	*Users can edit whatever they want to be the name of the expense but the expenses are not split up but categories.*
1. Be able to easily compare the different categories of spending with seeing the percent of income for each expense.	*Met, users can see all expenses next to each other with a clear percent of income.*
1. Make tools to allow users to track their spending over time.	*Not met*
1. Be able to save all stats so that everything is there the next time the user uses the program.	*Met, users can save their data and exit the program without losing said data.*

Client Feedback
- Client is satisfied with the product, as it completes all functions that they asked for and it runs well.
- The client needed a demonstration of how to access and run the program and plans to use it for personal use in the future.

Recommendations for Further Development

- **Better formatting of GUI for a more aesthetically pleasing look.**
- **Putting expense calculator as a website so that program can be accessed on any computer**
- **Add categories of spending to put their expenses in.**
- **Create a username and password system for better security.**
